

Protective Overlay Films: OL-1200

Avery Dennison OL-1200 is a premium clear overlay film designed with a special coating to prevent the formation of water droplets on the surface of finished signs. It was developed to add additional protection for signs used in climates with high humidity along with temperatures just above freezing.

OL-1200 features best-in-class durability with up to 10 year anti-dew performance and up to 12 year UV protection based on sheeting type. Don't let dew get you down. Use OL-1200 when anti-dew performance is a priority.

Features and Benefits

- Anti-dew coating to prevent formation of water droplets
- UV protection to extend sign life and performance
