S-9700 & V-3000 Delineator Series Conspicuity Tape

A solid alternative to
brittle button reflectors

Delineator Series

Provide additional visibility to road obstructions and vehicles with the Avery Dennison Delineator Series. Increase nighttime recognition and increased road safety with Avery Dennison conspicuity tapes.

Apply reflective delineator film to the sides of trucks, trailers, recreational, recycling, waste, maintenance, and utility vehicles while meeting SAEJ 292 and SAEJ 594 specifications. This film is easy to apply and is a better alternative to molded plastic reflectors that break on impact. Delineator conspicuity tapes can also be used for roadside warning devices like fire hydrants and snow plow markers.

Engineered with a single layer metalized construction, Avery Dennison conspicuity tape provides superior durability. Damaged air cells in the construction of other tapes can fill with dirt and water and lose reflectivity.

Features

Single layer construction that does not require edge sealing

Provides exceptional all-distance viewing at dawn, dusk, and night

Meets SAEJ 292, SAEJ 594

Series	Color	Die Cut	Marking	Durability*
S-9775	Red	No	No watermark	7 years
S-9776	Yellow/Amber	No	No watermark	7 years
V-3008R	Red	Yes, 2" x 3.5"	SAE A DOT	7 years
V-3076R	Yellow/Amber	Yes, 2" x 3.5"	SAE A DOT	7 years
