True Shape Nest in FlexiSign & Print 12

Because of the Omnidirectional nature of Avery Dennison Reflective sheeting, nesting your design can prevent waste and because of that, save you money.

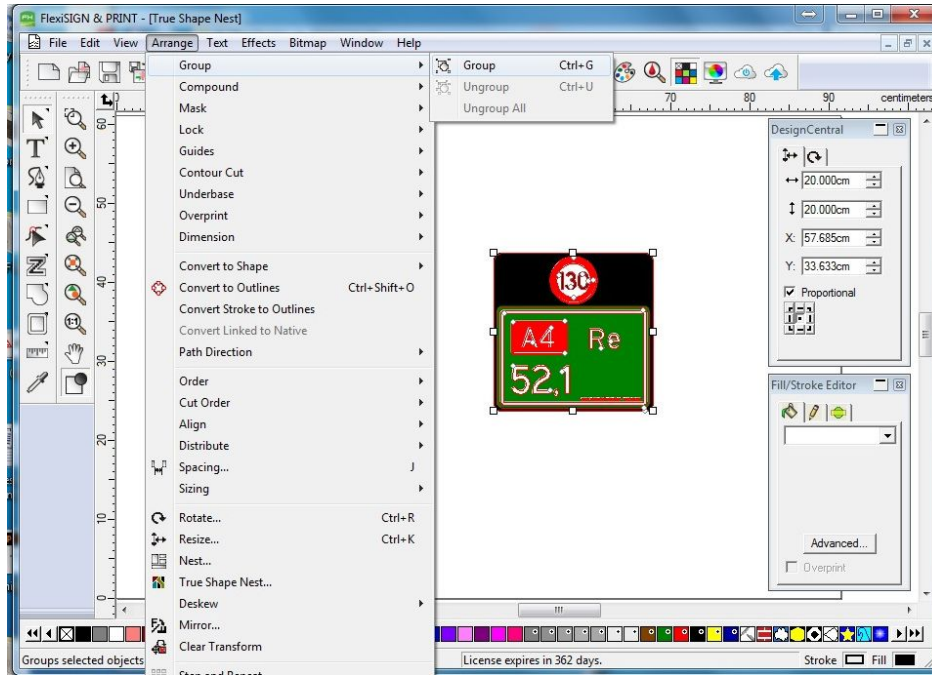

Manually nesting in your design software, can be time consuming. Flexi 12 offers True Shape Nest functionality. This makes nesting very simple and fast, allowing better utilization of the reflective sheeting.

The process

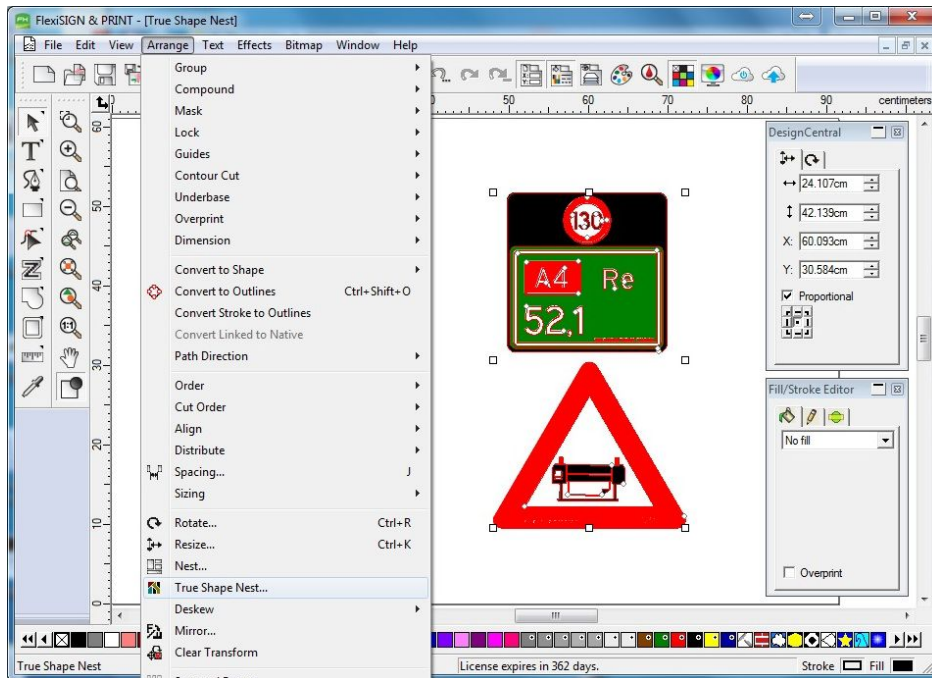

1. Open Flexi 12
2. Create or Import the artwork you would like to print

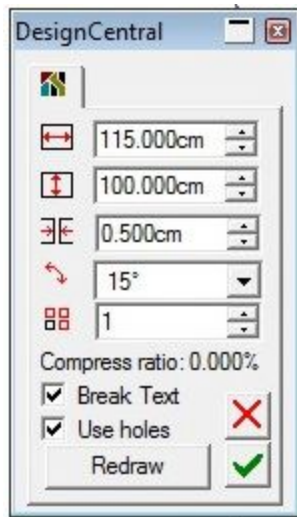

3. Make sure each item is grouped individually by selecting the item, go to Arrange > Group and click Group (Ctrl+G)

4. Select all the individually grouped items you would like to use to nest
5. With all items selected, go to Arrange > True Shape Nest

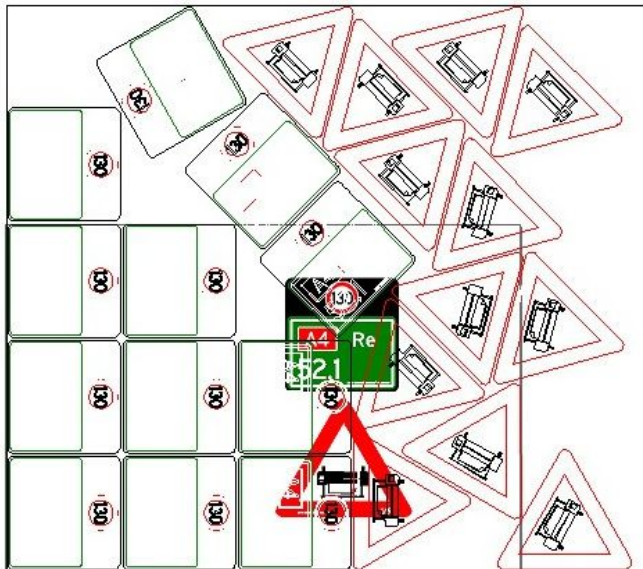

- This will open a new Palette called DesignCentral

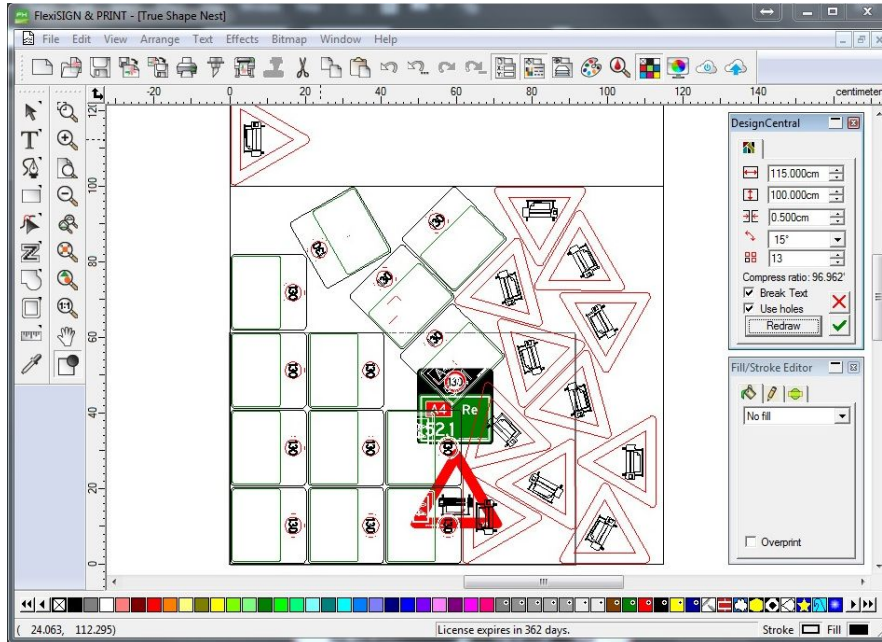

- In DesignCentral, you can do the following:
 - Set the width of the sheet for True Shape Nest
 - Set the height of the sheet for True Shape Nest
 - Set the distance between the individual, nested items (make sure there is some distance as this usually is easier/better for using the cutting device)
 - Set the rotation for the individual items
 - Set the amount of copies for each, individual item
 - Choose Break Text unless this leads to issues
 - Choose Use Holes unless this leads to issues
- Click the Redraw Button to see a preview of the result of the settings.

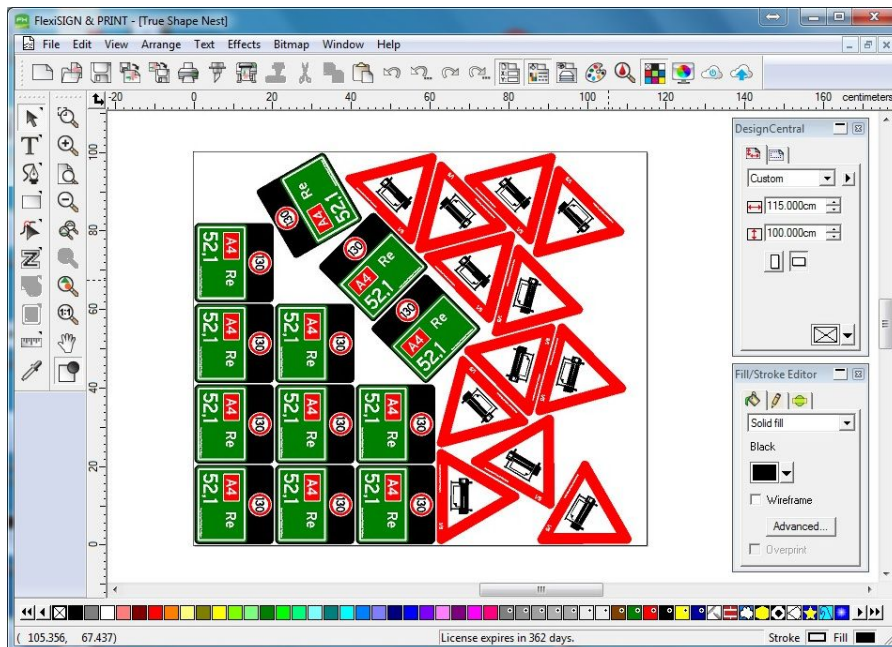

Note: with many images or complex shapes, the calculation may take a while.

9. If you see undesirable things happening, you can make changes to the settings above and click the Redraw Button to see a new preview
10. If you choose more copies than the sheeting dimensions can fit, FlexiSign & Print will automatically add another copy of the sheet or you can choose less copies and click the Redraw Button again

11. If you are satisfied with the results, confirm by clicking the green tick in DesignCentral and your True Shape Nest will be finished and available for further designing or printing

The above Avery Dennison literature provides information to the user for proper application, storage and other requirements. Please refer to Product Data Bulletins or your local Avery Dennison Representative for warranty information.
