

Avery Dennison OmniCube™ T-11500 Series Full Cube Retroreflective Sheeting

Built with full cube prisms, OmniCube is more efficient than sheeting with traditional truncated prisms.

OmniCube uses full cube prisms that are over 50% more efficient than traditional truncated prisms. Additionally, Avery Dennison’s Intelligent Cube Technology incorporates the needs of all vehicle types—trucks, SUVs, automobiles, and motorcycles—into one reflective sheeting.

Innovative Technology

The brightness of a sign or device is determined by the available light, the sheeting’s efficiency, and the driver’s position relative to the light cone. Thanks to its exceptionally efficient prism technology, OmniCube is the optimal choice for signs in low-illumination scenarios, such as guide signs or those situated in visually intricate urban environments. OmniCube is designed to eliminate rotational sensitivity, simplify production, and ensure uniform appearance for traffic signs.

Safety

NHTSA data reveals a stark reality: passenger vehicles face a threefold increased risk of fatal accidents at night compared to daylight hours. A vital safety measure to mitigate this danger is equipping drivers with full cube signs that offer superior visibility and legibility.

Product	T-11500 Series
Technology	Full Cube Microprismatic
Durability	Up to 15 years when combined with TrafficJet™ Print System inks and OL-1000 Anti-graffiti protective overlay.
Colors	8 colors (White, Yellow, Blue, Green, Red, Brown, Fluorescent Yellow, Fluorescent Yellow Green)
Class of Performance	ASTM D4956 IX, XI Full Cube Class 3 Visit reflectives.averydennison.com/pdb for additional specifications and product details.
Applications	Permanent Traffic Signage
