Avery Dennison® WR-1000 Series Pre-Printed Sheeting for Beacons and Barriers

Beaded Class 1 retroreflective sheeting

MAKING POSSIBLE™

The WR-1100 series features a premium, beaded reboundable construction optimized for plastic substrates. To facilitate efficient deployment, the sheeting is pre-printed with high-visibility red stripes, meeting the rigorous requirements of beacon and barrier applications. This series is fully compliant with EN 12899-1 RA1 standards and offers a reliable 3-year performance life, supported by a comprehensive 3-year warranty.

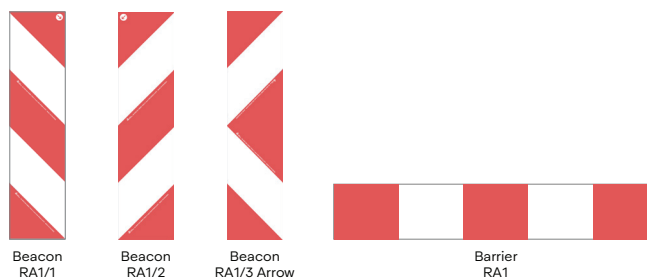

Features and Benefits

- High-tack adhesive bonds to low surface energy plastics for year-round performance, resisting cold-shock delamination
- Durable construction won't rip or tear during application
- Long-range visibility—day and night
- Class EN 12899-1 RA1
- Durability of up to 3 years, vertical exposure only

Availability

- Pre-printed sheeting - White & Red (Left, Right & Arrow)
- Pre-printed rolls - White & Red

Name	Width (m)	Length (m)	Packaging
WR-1140 Left Beacon C1	0.25	1	100 SH/BX
WR-1141 Right Beacon C1	0.25	1	100 SH/BX
WR-1146 Arrow Beacon C1	0.25	1	100 SH/BX
WR-1147 Barrier C1	0.10	50	4 RL/BX
WR-1147 Barrier C1	0.25	50	2 RL/BX
